Centre releases Rs 8,873.6 cr fund to states to fight Covid

New Delhi, The Finance Ministry has released an amount of Rs 8,873.6 crore in advance towards central share of the State Disaster Response Fund (SDRF) for FY22 to help states in their fight against Covid-19. The advance release of 1st instalment of central share towards SDRF has been released as a special dispensation on the recommendations of the home ministry. Normally, the first instalment of SDRF is released in the month of June as per the recommendations of the Finance Commission. However, in relaxation of normal procedure, not only has the release of SDRF been advanced, the amount has also been released without

waiting for the utilization certificate of the amount provided to the States in the last financial year. Up to 50 per cent of the amount released i.e. Rs 4,436.8 crore can be used by the States for COVID-19 containment measures. The funds from SDRF may be used by the States for various measures related to containment of COVID-19 including meeting the cost of oxygen generation and storage plants in hospitals, ventilators, air purifiers, strengthening ambulance services, COVID-19 hospitals, Covid Care Centres, consumables, thermal scanners, personal protective equipment, testing laboratories, testing kits, containment zones, etc.

Hyundai Motor India April cumulative sales at over 59K units

New Delhi, Automobile manufacturer Hyundai Motor India's cumulative sales during April stood at 59,203 units. Accordingly, the company sold 49,002 units in the domestic market during the month under review. It shipped out 10,201 units to foreign countries last month. "While our efforts presently focus primarily on supporting the lives and livelihood of people, we have also received positive sales results in April 2021," said Tarun Garg, Director (Sales, Marketing & Service), Hyundai Motor India.

Business Brief III

Petrol, diesel prices remain static for 17 days in a row

New Delhi, Fuel prices in the country remained unchanged on Saturday as oil marketing companies decided to wait and watch the situation prevailing in global oil markets before restarting daily revision of petrol and diesel prices. Sources indicated that price revisions may begin anytime next week after results to state elections are declared. However, whether price of petrol and diesel would move up or down then would depend on actual average global price in the last fortnight of March. OMCs benchmark retail fuel prices to a 15-day rolling average of global refined products' prices and dollar exchange rate. With no price change on Saturday, pump price of petrol and diesel remained at Rs 90.40 a litre and Rs 80.73 a litre respectively in Delhi. This is 16 consecutive day when fuel prices have not been revised. The price of the two auto fuels had fallen by 16 paise and 14 paise per litre respectively on April 15 after a 15 day break when OMCs kept its prices static. Thereafter revision of fuel prices have been halted. Across the country as well the petrol and diesel price remained unchanged on Saturday but its retail levels varied depending on the level of local levies in respective states. Premium petrol, however, continues to remain over Rs 100 a litre in Mumbai and several other cities across the country. The OMCs went on price cut for the first time this year on two consecutive days - March 24 and 25 after keeping oil prices steady for past 24 days. It again reduced the price on March 30. Thereafter, fuel prices have remained unchanged for past 15 days before falling again on April 15. In all petrol prices have fallen by 77 paise per litre while diesel by 74 paise per litre in 2021 so far. Earlier, petrol and diesel prices increased 26 times in 2021 with the two auto fuels increasing by Rs 7.46 and Rs 7.60 per litre respectively so far this year. With global crude prices at over \$67 a barrel mark, OMCs may have revise fuel prices upwards again if there is any further firming up.

Govt further extends tax compliance timelines amid pandemic

New Delhi, In view of the severe Covid-19 pandemic and requests put forward by taxpayers, tax consultants and other stakeholders, the government has decided to provide further relief to taxpayers by extending various time limits of compliances. Accordingly, the Central Board of Direct Taxes (CBDT) has now extended the time limit for filing of belated return and revised return for Assessment Year 2020-21, by two months from March 31, 2021 to May 31, 2021. Also, Income-tax return in response to notice under Section 148 of the Income Tax Act, for which the last date of filing of return of income under the said notice is April 1, 2021 or thereafter, may now be filed within the time allowed under that notice or by May 31, 2021, whichever is later.

The CBDT has also granted extension for filing of appeals before Commissioner (Appeals) to May 31, 2021. Similar extension has also been given for filing of objections to Dispute Resolution Panel (DRP) under Section 144C of the Act.

The compliance deadline has also been eased by two months till May 31, 2021 for Payment of tax deducted under Section 194-IA, Section 194-IB and Section 194M of the Act, and filing of challan-cum-statement for such tax deducted. These are currently required to be paid and furnished by 30 April, 2021 (respectively).

Also, Statement in Form No. 61, containing particulars of declarations received in Form No. 60, which is due to be furnished on or before 30 April, 2021, can now be furnished on or before 31 May, 2021.

The relaxations are the latest among the recent initiatives taken by the government to ease compliances to be made by the taxpayers with the aim to grant respite during these difficult times, a Finance Ministry statement said.

The government had also relaxed few tax compliance related issues last week on Saturday.

RIL's swift steps make it largest producer of medical Oxygen

Mumbai, As India grapples with an unprecedented new wave of the Covid Pandemic, Reliance Industries has scaled up production of medical grade liquid oxygen, becoming country's largest producer of this life-saving resource from a single location in just over a year's time.

Traditionally, Reliance is not a manufacturer of medical grade liquid oxygen. Yet, starting from Nil before the pandemic, the company is its largest producer in the country from a single location. At its refinery-cum-chemical complex in Jamnagar and other facilities, RIL now produces over 1000 MT per day - or 11 per cent of India's total production - meeting the needs of nearly every one in ten patients.

A company statement said that under personal supervision of Mukesh Ambani, Chairman and Managing Director, at Jamnagar, Reliance has adopted a two-pronged approach to strengthen the availability of medical oxygen in India: the company is refocusing several industrial processes at Reliance's Jamnagar and other facilities for rapid scale-up in

production of medical grade liquid oxygen. Also, RIL is augmenting loading and transportation capacities to ensure its swift and safe supplies to states.

Commenting on the initiatives, Mukesh Ambani, Chairman and Managing Director, Reliance Industries Limited, said: "For me and for all of us at Reliance, nothing is more important than saving every life as India battles against a new wave of the COVID-19 pandemic. There is an immediate need to maximise India's production and transportation capacities for medical grade oxygen."

"I am proud of our engineers at

Jamnagar who have worked tirelessly, with a great sense of patriotic urgency, to meet this new challenge. I am truly humbled by the determination and sense of purpose shown by the bright, young members of the Reliance family who have once again risen to the occasion and delivered when India needs it the most."

Nita Ambani, Founder-Chairperson of Reliance Foundation, said: "Our country is going through an unprecedented crisis. We at Reliance Foundation will continue to do everything we can to help. Every life is precious. Our plants at Jamnagar refinery have been repurposed overnight to produce medical grade liquid oxygen that is being distributed across India. Our thoughts and prayers are with our fellow countrymen and women. Together, we will overcome these difficult times."

Prior to this pandemic, Reliance was not a manufacturer of medical grade liquid oxygen. However, RIL engineers quickly reconfigured and optimised current operations - designed for Refining and Petrochemicals grade oxygen - to produce high-purity medical oxygen.

SAIL to set up additional 2,500 beds with gaseous oxygen facilities

New Delhi, Country's largest steel maker Steel Authority of India Limited (SAIL) is planning to set up jumbo medical facilities of about 2,500 beds with gaseous oxygen (GOX) for Covid treatment.

This will be in addition to the facilities currently available at SAIL's five integrated steel plants at Bhilai (Chhattisgarh), Bokaro (Jharkhand), Rourkela (Odisha), Durgapur and Burnpur (West Bengal).

These jumbo facilities are being

planned outside the existing hospital facilities and shall have oxygen support through a dedicated gas line drawn directly from the steel plants instead of extracting gaseous oxygen from liquid medical oxygen as is being done in the own hospitals of SAIL currently.

At the suggestion of the government, SAIL shall use gaseous oxygen directly as an additional source of oxygen as the demand for liquid medical oxygen is high currently, the company said in a statement.

These 2,500 bed facility will be de-

veloped in phased manner in collaboration with the respective state governments. In the first phase, the company will set up about 700 beds which will be scaled up to 2,500 beds across all the five locations. Currently, there are around 3,000 beds in the five SAIL hospitals and about 45 per cent of beds have been earmarked for Covid patients. The company remains committed to stand by the nation in fighting against the corona pandemic in every possible way, the SAIL statement added.

April GST collection sets new record, surges over Rs 1.41L cr

New Delhi, India's gross GST revenue collection reached a new record high of over Rs 1.41 lakh crore in April 2021, beating all expectations of lower collections in wake of disruptions clauses by fresh wave of Covid-19.

Accordingly, the GST revenues during April 2021 are the highest since the introduction of the tax. The same feat was achieved even in March when collections at over Rs 1.23 lakh crore was the highest since introduction of GST in 2017.

"In line with the trend of recovery in the GST revenues over past six months, the revenues for the month of April 2021 are 14% higher than the GST revenues in the last month of March 2021," the Finance Ministry said in a

statement. "During the month, the revenues from domestic transaction (including import of services) are 21 per cent higher than the re-

venues from these sources during the last month."

According to the statement, the gross GST revenue collected in the month of April 2021 is at a

record of Rs 1,41,384 crore of which CGST is Rs 27,837 crore, SGST is Rs 35,621, IGST is Rs 68,481 crore (including Rs 29,599 crore collected on import of goods) and

Cess is Rs 9,445 crore (including Rs 981 crore collected on import of goods).

"During this month the government has settled Rs 29,185 crore to CGST and Rs 22,756 crore to SGST from IGST as regular settlement. The total revenue of Centre and the States after regular and ad-hoc settlements in the month of April 2021 is Rs 57,022 crore for CGST and Rs 58,377 crore for the SGST."

Despite the second wave of Covid-19 pandemic affecting several parts of the country, Indian businesses have once again

shown remarkable resilience by not only complying with the return filing requirements but also paying their GST dues in a timely manner during the month, the Finance Ministry statement said.

"The all-time high collections which relates to supplies made in March 21 could now give way to muted collections in the coming months due to the lower economic activities in April. The continuing focus on improving compliance and the steps taken to curb evasion appears to be significantly improving the GST collections," said M. S. Mani, Senior Director, Deloitte India.

GST revenues have not only crossed the Rs 1 lakh crore mark during successively for the last seven months but have also shown a steady increase. These

are indicators of sustained economic recovery during this period, Finance Ministry said.

Closer monitoring against fake-billing, deep data analytics using data from multiple sources including GST, Income-tax and Customs IT systems and effective tax administration have also contributed to the steady increase in tax revenue, it added. The return filing process.

Leading Hernia experts see Anatomical Mesh as the Future in Inguinal Hernia Repair

Ahmedabad, Highlighting the importance of timely hernia treatment and efficacy of using Anatomical Mesh to treat inguinal Hernia in patients, Dr Vishal Soni, Advance Laparoscopic and Gastrointestinal Surgeon & Hernia Specialist, Zydus Hospital, Ahmedabad joined the 'Choose to Conform' campaign in Gujarat to make patients aware of hernia issues, optimal management & appropriate mesh selection. Groin (Inguinal) Hernia has been a disease ever since mankind decided to walk upright. Globally, over 10 million Hernias are repaired each year. The lifetime risk of developing Inguinal Hernia is about 15% - 20% (1 in 6) in men and 3% (1 in 30) in women. The risk and inci-

dence of Hernia increase with advancing age. A Hernia occurs when an internal organ protrudes through a weakness or a gap in the patient's muscle or tissue covering it. Groin Hernias are among the most common Hernias and occur due to weakness in muscle walls that guard the inguinal (groin) region. Small Hernias may remain asymptomatic for long, leading to patients not taking their condition seriously and delaying the surgical repair. This may result in serious & occasionally life-threatening complications. Elaborating on advanced treatment solutions for Hernia, Dr Vishal Soni says, "Hernia repair is one of the most common surgical procedures performed globally and use of appropriate Her-

nia mesh products to surgically reinforce or reconstruct anatomical defects is now the standard-of-care. Hernia surgeons are now adopting Minimally Invasive (popularly called Laparoscopic) Techniques to repair Hernia instead of the conventional Open Surgical methods due to ease of performance and markedly improved surgical outcomes. The groin (inguinal) region, when approached laparoscopically isn't a flat surface but rather a curved one. Hence an optimal mesh reinforcement should conform to the natural shape of the groin from within, seen laparoscopically. The new and advanced Anatomical 3-Dimensional Mesh structurally matches the normal inguinal area anatomy and covers all the possible Groin Hernia sites.

Mood at Nilambur will be somber when votes will be counted

Thiruvananthapuram, When all are interested in knowing who will rule Kerala for the next five years and will be closely following the counting of votes that begins at 8 a.m. on Sunday, one result and the progress in counting will be observed by all with a heavy heart and that is at the Nilambur assembly constituency in Malappuram district. The reason, why it's going to be like that is V.V. Prakash, hugely popular Malappuram district Congress Committee president and the party candidate from the Nilambur assembly constituency, passed away after he suffered a cardiac arrest in the wee hours of Thursday. The 56-year-old Prakash, according to many of the exit polls conducted, reveal that he is likely to win and if that be the case, it could be even heart breaking for all. "He left without waiting to know the result," continues to be the general response from all. Incidentally if the sitting legislator P.V. Anwar of the Left is going to be re-elected, then there will be no re-election and should Prakash win, then it will be the first constituency where a by-election will be held, after the 15th Kerala Legislative Assembly will be formed. Two time former Congress Chief Minister Oommen Chandy who returned to his home here, last night after attending the funeral of Prakash said, he is still to come to terms with the passing away of Prakash. Incidentally in the 1996 assembly polls a similar incident took place when P.K. Sreenivasan of the CPI passed away a day before the counting.
